Description of Property and Justification: *(Please attach map and photo)*

The Sachs Residence, a late nineteenth century brick house, is an example of the Second Empire style. It was inventoried and included in the MIHP in 1975. Section 7 describes the property, although the directions appear to be incorrect. The main façade of the dwelling is on the west side, which has a one story open porch. The east façade is the rear of the building and that has been altered as described in the MIHP form. Section 8 was not completed. The Sachs Residence is a farm, consisting of a three story brick dwelling, two barns, a meat house and a tenant house. These buildings remain in place and appear unchanged from the 1975 description. The two barns have board and batten siding and standing seam metal roofs. The larger of the two barns has a cupola on its roof. The meat house is of brick with a hipped roof. The two bay, two story tenant house stands to the east of the meat house. It is of brick with a side gable roof of slate. The Sachs Residence is an example of a simple mansard roof with gabled dormer windows. The cornice is plain and lacks the brackets that are typical of this style. The windows are original and a porch covers three of the five bays of the front façade.

According to the Anne Arundel County Tax Records, the Sachs Residence was constructed in 1890. The G. M. Hopkins' 1877 Atlas of Anne Arundel County notes that property in the vicinity of the Sachs Residence was owned by Dr. S. P. Hamilton, who was a farmer and doctor in northern Anne Arundel County. The Sachs Residence is not a high style example of the Second Empire

style, but it is a substantial building that suggests that its original owner was quite prosperous. SHA recommends that a construction date around 1875 is more probable. The 1877 Atlas indicates that Dr. Hamilton owned 103 acres. By 2005, the Sachs Residence had been reduced to 13.78 acres. The property also appears on the 1907 15' USGS Relay Quadrangle, although a property owner is not noted.

During the late nineteenth century, as the canning industry in Baltimore grew, the farms of northern Anne Arundel County became famous for the produce that was sent as far north as Boston and as far west as Denver. Peaches, strawberries and asparagus were all grown and sent to market from truck farms in the County. The truck farms remained viable until the 1920s when farmers in the deep south, such as Georgia, began to use refrigerated trucks and trains to transport their goods earlier in the season. Strong competition and the Depression caused farming to gradually cease to be a productive way of life in the northern part of the county (Mumford).

The Maryland State Roads Commission (SRC) constructed the Baltimore-Washington Parkway on the northwest side of the Sachs Residence in 1948. It appears to have divided a farm, which then belonged to "Henderson" as noted on the 1948 plan sheet for the Nursery Road Underpass. The 1948 plan sheet indicates that in addition to the houses and barns, there were two smaller buildings, perhaps a chicken coop and a shed, standing east of the barns. These have since been demolished. At that time the house was surrounded on three sides by trees. Some of these trees continue to shelter the front of the dwelling.

The Sachs Residence is an unusual example of the Second Empire style in a rural setting. Although there are a number of Second Empire buildings in Annapolis and other towns throughout the county, there are a limited number of such buildings in the countryside. The Sachs Residence demonstrates its association with an important owner through its design but also reflects its rural context through its less decorated aspect. The historic boundary for the Sachs Residence is confined to the 13.78 acres noted on Anne Arundel County Tax Map 4A, Parcel 2. Because the Sachs Residence retains integrity of design, workmanship, materials and setting, SHA has determined that it is eligible for inclusion in the NRHP under Criterion C (architecture). Research conducted did not identify events or persons of local, state or national significance and the Sachs Residence is not eligible for the NRHP under Criterion A or B. Criterion D was not investigated as part of the historic standing structures study.

SHA was denied access to the property in July 2004. Photographs of the resources were taken from a vantage point that provided adequate views in December 2005.

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

This farmstead complex was initially surveyed and photographed by Anne Arundel County's Planning Office in 1975, but was not evaluated for National Register eligibility at that time. At the time of the survey, the main house and outbuildings displayed considerable historic integrity. Most of the buildings on this property were partially visible from the public road in summer-fall 2002, when the property was resurveyed for DOE purposes. They appear to be well-maintained but not significantly altered from their condition in 1975. The owner of the farmstead, Mr. Charles Sachs, denied access to the property for purposes of examining and photographing the buildings in October 2002, citing privacy concerns.

The house and three brick outbuildings are set within a brick-walled compound facing northeast from the top of a hill. The front of the compound is screened by several tall hardwood trees. A cluster of two large barns and two smaller buildings surrounded by small trees, vines, and bushes is located across the driveway immediately to the south of the house complex. The driveway runs south to intersect West Nursery Road.

The main section of the house is five bays wide and one bay deep, with a two-story, three-bay-long rear ell. The ell and a one-story brick addition to it (built before 1975) could not be seen. The front façade of the main section is dominated by a three-bay

Sachs residence ("Lockwood")

Page 2

center front porch, which retains its original turned posts and scroll-cut roof balustrade. The front door has a rectangular transom and sidelights. The house displays mostly French Second Empire architectural characteristics, including the mansard roof with shallow-gabled dormers, a deep cornice, and tall, narrow proportions in its massing and fenestration. There are three front dormers, the center of which has a paired window, and one dormer on each side of the roof. Since the house was photographed in 1975, the owners have replaced the windows and added louvered shutters, but the house appears otherwise intact.

To the south of the house is a one-story brick meat house with a pyramidal roof, which is one bay wide on each side. To the southwest of the meat house is a two-story, two-bay side-gabled structure with deep eaves, six-over-six windows with shutters, and a rear corner chimney. Both structures are well-maintained and appear to have had some Colonial Revival style renovations. Behind the two-story outbuilding is a one-story side-gabled structure that appears to be a garage.

Only two barns in the complex outside the house compound were visible. The large, two-story bank barn closest to West Nursery Road is set parallel to both the road and the property's driveway. This gable-end frame barn has board-and-batten siding, a corrugated-metal roof, and a pyramidal-roofed original cupola with louvered sides on top. An area beneath the east front of the barn appears to be an open shelter for animals, but the heavy overgrowth of vines in the former barnyard obscures most of this level. A second barn, set perpendicular to the first, is parallel to the south wall of the house compound, and is one-and-one-half stories tall. It has board and batten siding and a corrugated metal roof with no cupola. Two narrower buildings to the west of these barns could not be viewed.

According to files at the Anne Arundel County Planning Office, this property is the estate called "Lockwood," which was constructed by Basil Smith Benson in 1868. A drawing of "Lockwood" in the files of the Ann Arundell Historical Society at the Benson-Hammond House reportedly bears close resemblance to the Sachs residence, and the property's hilltop setting at one time commanded a view all the way to Baltimore. A large wooden sign along the driveway south of the barns reads "Lockwood's Adventure, 1769; Homestead Circa 1868." The Sachs family has owned the house for several generations, and the present owner's mother now resides there.

Basil Benson had a total of nineteen children by two wives, fifteen of whom survived to adulthood. At his death in 1884, he left his farm to his two youngest sons, Summerfield and Joseph, who divided the property in two around 1888. Summerfield constructed the large brick house on the opposite side of West Nursery Road, just north of the Baltimore-Washington Parkway. The construction of the Baltimore-Washington Parkway bisected the former Basil Benson estate, and land to the south of "Lockwood" was later sold off by the Sachs family and developed as an office park. Most of the farm's core buildings have survived, though outlying tenant houses and other farm structures were likely destroyed by the taking and subdivision of much of the original tract.

The Sachs residence and its outbuildings appear to meet NRHP Criteria A and C. As the residence and truck farm of a prominent local family, the property is important to local and county history. It is an important and unusually intact example of a prosperous post-Civil War truck farm, one of many that drove the local economy until World War II. The house is also an excellent example of a French Second Empire home, adapted to the local vernacular and probably one of the finest homes in the area at the time it was built. The surviving barns and other outbuildings represent a rare collection of late-nineteenth-century farm structures in their original setting and arrangement, as well as individual examples of their types. Taken as a whole, the property is recommended eligible for the NRHP.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>This handsome, late 19th century brick house is located on a hill above the Baltimore Washington Parkway at Nursery Road. The structure is 2 1/2 stories high, having a mansard roof. It is one room deep and has a center entrance and hall. The entrance, on the east elevation is covered by a one story, open porch. The porch is supported on elaborate turned columns and has a roof deck, surrounded by a rail and scroll-cut slats. <i>scroll-cut</i></p> <p>A two story A-roofed wing extends from the west side (back) of the house. A new, one story addition has been made to the south-west corner between the wing and the house. The house is in excellent condition and does not appear to have been altered significantly. The mansard roof is a unique feature of the house.</p> <p>To the south of the house are several barns and a brick meat house. The barns are sheathed in board and batten siding and have fieldstone foundations. They are in excellent condition. The meat-house has a square plan with the entrance on the east side. It has a hip-roof topped with a wooden finial.</p>
